PLATE COMPACTOR

GP95

Model	Plate Size	Operating Weight	Centrifugal Force	Travel Speed (m/min)	Limited Grade Ability	Engine Make & Model	Power Source	Fuel Type
GP95	W: 500 mm (20") L: 525 mm (21")	95 kg 210 lbs	15 kN (1,530 kgf)	40-70	35%	Honda Gx160	Output 4.0 kW (5.5PS)	Petrol

WHEEL KIT

The GP95 has an integrated wheel kit. This helps transport the plate around the jobsite and they can be folded away when finished for easier storage.

RUBBER MAT

The rubber mat kit is used for block paving and can be purchased as an optional extra.

LIFT HOOK

The lift hook helps to move the GP95, it can be unfolded when in use. There is a rubber flap on the top of the frame which covers the lift hook when it is not in use.

PLATE COMPACTOR GP95

THROTTLE LEVER

Aluminium throttle lever for durability, strength and comfortable operator control.

FRAME

Enclosed frame for protection of the engine. Rubber flap reveals the lift hook for moving.

WHEEL KIT

Comes complete with a set of built-in wheels for easier transportation around the jobsite. They can also be folded up when not in use.

BELT COVER

The cast aluminium belt cover provides a longer lifespan to the clutch and engine. It also protects the clutch from sand and dust.

WATER TANK

15L Water tank suitable for asphalt applications.

BASE PLATE

Ductile Iron base for strength and longevity.

GP95

Perfect for general compaction applications the GP95 is an economical and high performance forward travel plate compactor.

Optional rubber mat kit for block paving applications.
