## Resin Trowel Mini

The all-new 24 inch Resin Trowel ushers in a new era of efficiency offering a more precise solution for finishing resin bound surfaces. The Mini makes easy work of transitioning from one grade to another. As it moves from one grade to another, the machine follows the contours of a driveway without digging into the surface.

\*Powered by a 4 stroke Honda GX50 low emissions engine

Robust, durable and fully sealed planetary gearbox.

Variable throttle control

Easy control directional steering function. Allows for precise movement

Centrifugal safety stop

The spider plate assembly of the Mini is constructed from cast iron, much more robust than other machines. Precision machined arms ensure that all four blades are balanced and equally in contact with the surface. During the life of the machine these arms can be reset.

Blade pitch function of up to 25 degrees for greater, uniform compaction

Plastic Pan available

Plastic blades to prevent any burnishing of lighter coloured resin.

Steel Blades also available.
